### PROJECTS

**Towards safer Vehicles/driving With Advanced features, collision detection and Features of Airbags mechanism in 2 wheeler**

This project consist of following features:-

1. The system detects whether the rider is wearing a helmet or not, if he/she wears then only the vehicle will start.
2. Detects the amount of alcohol consumed by the rider, if the rider is over drunk, the bike engine will not start.
3. While driving, it detects the drowsiness and alert via alarms.
4. When the bike rider meets with an accident then Detects it and gives the notification to the registered contact with a location.

### ACHIEVEMENTS & AWARDS

My Final year project has been approved by KSCST(Karnataka State Council for Science and Technology) under "Student Project Programme - 45th Series" with Project Proposal Reference No. : 45S\_BE\_3247.
